Assignment 1
Andrew Sims
1/28/20

I chose to use the horseshoe crab data since I spend so much time looking at trees. I was interested in if there were any clear factors driving population density.

This figure represents a 'shotgun' approach for exploration of trends; I just guessed with temps and salinity.

Horseshoe Crab Observations: Salinity as a Driver for Habitation

This figure visualizes the distribution of a potential predictor trait and its co-occurrence with the response of interest.
